THIRD QUARTERLY RESULTS FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2005

Characteristics of The Growth Enterprise Market (“GEM”) of The Stock Exchange of Hong Kong Limited (the “Exchange”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Exchange takes no responsibility for the contents of this announcement, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss however arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors (the “Directors”) of Excel Technology International Holdings Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of The Stock Exchange of Hong Kong Limited (“GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: – (1) the information contained in this announcement is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this announcement misleading; and (3) all opinions expressed in this announcement have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

The financial information has been prepared in accordance with all applicable new HKFRSs issued by the HKICPA, accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance.

This financial information also complies with the applicable disclosure requirements of the Growth Enterprise Market operated by The Stock Exchange of Hong Kong Limited.

The measurement basis used in the preparation of the financial information is historical cost modified by the marking to market of certain investments in securities at the balance sheet date.

All significant intra-group transactions and balances have been eliminated on consolidation.

BUSINESS REVIEW

The Group recorded an increase of 10% in turnover of HK\$134,629,000 for the nine months ended 30 September 2005, compared with HK\$122,403,000 for the corresponding period of last year.

By sector performance comparison of nine months of 2005 with the same period of 2004, enterprise software products increased by 26%, systems integration dropped by 17%, revenue on professional services grew by 195% and ASP services increased slightly by 2%.

Net loss attributable to equity holders of the parent for the nine months ended 30 September 2005 amounted to HK\$13,911,000. This represents an increase of 60% loss when compared with the same period of last year (2004: loss of HK\$8,696,000). This increase is mainly due to the initial set up cost of adding substantial capability in Shenzhen and setting up the Dalian and Hangzhou operations for the outsourcing business in China. In addition, the Group has taken a more prudent approach this year in expensing off the research and development work of our software packages, which also contributed to the increase of expenses incurred.

FUTURE PROSPECTS

Continuing the growth trend in the first half of 2005, our enterprise software business recorded a strong growth in the third quarter this year. We anticipate this positive trend will continue as we have received many inquiries of our software packages from banks and financial institutions in Hong Kong and around the region.

On the software development outsourcing business, we are running into the peak of our initial investment period. We have completed all the legal and regulatory procedures in setting up our outsourcing centers in Dalian and Hangzhou, which are now in full operations, and the new center is being set up in Taipei. A number of outsourcing contracts have been awarded by brand-name companies outside of China who want to try out our service, and they will be good reference base for us to take on larger outsourcing potentials. These outsourcing centers are expecting to generate income in the coming months.

With a strong pipeline of the systems integration opportunities in China, and the many potentials in enterprise software and outsourcing business we have on hand, we are quite confident that the Group will be heading for a better last quarter this year.
